universal hinge for Eurogroove applications**

SFS intec

The Dynamic 3D hinge is the solution from SFS intec for door producers requiring a universal hinge for application into Eurogroove. Developed for both, entrance and interior doors, as well as windows which can be produced from different materials such as PVC-U, aluminium or timber, this hinge gives a unique solution to a wide range of applications.

Adjustable in three dimensions: horizontal +/- 2mm, in height +/- 4mm and gasket pressure min +/- 1mm, and in addition, the three rings ensure high stability and perfect alignment. The installation is also very easy, using a single drill bit and a user friendly jig specifically developed for fast application.

As with all SFS intec hinges, the new Dynamic 3D achieved over 200.000 cycles, tested using a door of 140Kg, confirming once more the quality standards which our customers are accustomed to.

A wide variety of powder coated and metallic finishes ensure Dynamic 3D to be suitable for virtually any design, further enhancing the value of your door or window.
